

SARPER AYDOG

Game Designer - Level Designer

Munich, Germany · aydogsarper@gmail.com · +49 1573 1146675

Passionate about arthouse films and indie games, I aim to create compelling game experiences that blend artistic expression with broad appeal, delivering both fun and a meaningful, positive impact.

EXPERIENCE

Aug 2026 - Present

Solid River

QA Tester

welevel, Munich

Dec 2025 - Present

G-Hell

Game Design, Level Design, Environment Art

Lab Rats Interactive (CGL Game Studio), Köln, Germany

- Working on G-Hell, an action-roguelike autobattler, primarily as level designer; the role expanded to include character controller design and enemy/interactable systems.
- Designed the enemy spawn system and level interactables (functions, placement logic) in close collaboration with the design team.
- Modeled around 95% of the scene's environment art due to limited art team capacity, in a minimalist, low-poly style supporting the game's geometric enemy designs.
- Playtested the level at Nacht der Technik and Gamescom; continue to iterate on it as development progresses.

Aug 2024 - Nov 2024

Greening Games

Game Designer

Cologne Game Lab, TH Köln, Köln, Germany

- Designed a card game promoting environmental awareness in the game industry.
- Developed gameplay mechanics that emphasize the project's educational goals, while ensuring a fast-paced, engaging experience.
- Contributed to the card design and strategic elements simulating the challenges and solutions for reducing environmental impact in the gaming industry.
- Participated in the "Greening Games" event, which highlighted innovative approaches to environmental consciousness in the game industry.

Jan 2023 - Aug 2023

Carachnophobia

Game Designer

Redactor Interactive, Ankara, Türkiye

- Designed core gameplay mechanics, focusing on player progression for different playstyles, leveling, and customization options.
- Worked on combat systems and enemy design, contributing to the game's challenge and player experience.
- Assisted with world-building and narrative design, helping shape the game's setting, lore, and story.
- Additional level design and 3D art work: created block-out scenes to prototype and test the interaction between player and environment, plus hard-surface modeling and sculpting of non-humanoid characters and texturing.

Steam Page: Carachnophobia

Jan 2023 - Jul 2023

Hexoria, Lemonade Party

Game Designer (Part-time)

Two Page Games, Ankara, Türkiye

- Hexoria: contributed to the design and development of a roguelite, turn-based card game with a focus on gameplay elements and resource management; hard-surface modeling and implementation in Unity.
- Lemonade Party: assisted in the design of a casual mobile game emphasizing intuitive, quick-play mechanics; developed core systems for player interaction, level progression, and reward loops to boost retention.
- Additional 3D art work: hard-surface modeling and scene work in Unity, enhancing visual experience and gameplay immersion for both games.

Jul 2022 - Dec 2022

Mount & Blade II: Bannerlord

Game Design & Level Design Internship

TaleWorlds Entertainment, Ankara, Türkiye

- Overhauled the crafting system's requirements for Mount & Blade II: Bannerlord, covering around 1,200 crafting items, many of which weren't documented at all before this.
- Tested every item myself, identified inconsistencies through both testing and community reports of broken builds, and presented targeted fixes with supporting rationale to the lead designer.
- Liaised directly with the engineering team to access data through XML files when documentation was missing, building and re-implementing changes through the same pipeline.
- Studied the studio's in-house level editor and came up with level concepts for castle and village scenes, with a strong focus on gameplay, environmental storytelling, and player experience.

Mar 2022 - Jan 2023

Early prototypes

Game Designer, Level Designer & 3D Artist

Animation Technologies and Game Development Center, ODTÜ Teknokent, Ankara, Türkiye

- Pre-incubation phase of Redactor Interactive; worked on the overall design of several game prototypes.
- A competitive 3D platform/shooter/multiplayer game inspired by Garry's Mod Deathrun.
- An FPS built around a first-responder police officer concept with narrative progression.
- An RC-car racing game concept.

EDUCATION

2023 - Present

Digital Games, M.A.

Cologne Game Lab, TH Köln, Köln, Germany

2019 - 2021

Computer Graphics and Game Technologies, M.A.

Hacettepe University, Ankara, Türkiye

2012 - 2019

Mechatronics Engineering, B.Sc.

Atılım University, Ankara, Türkiye
